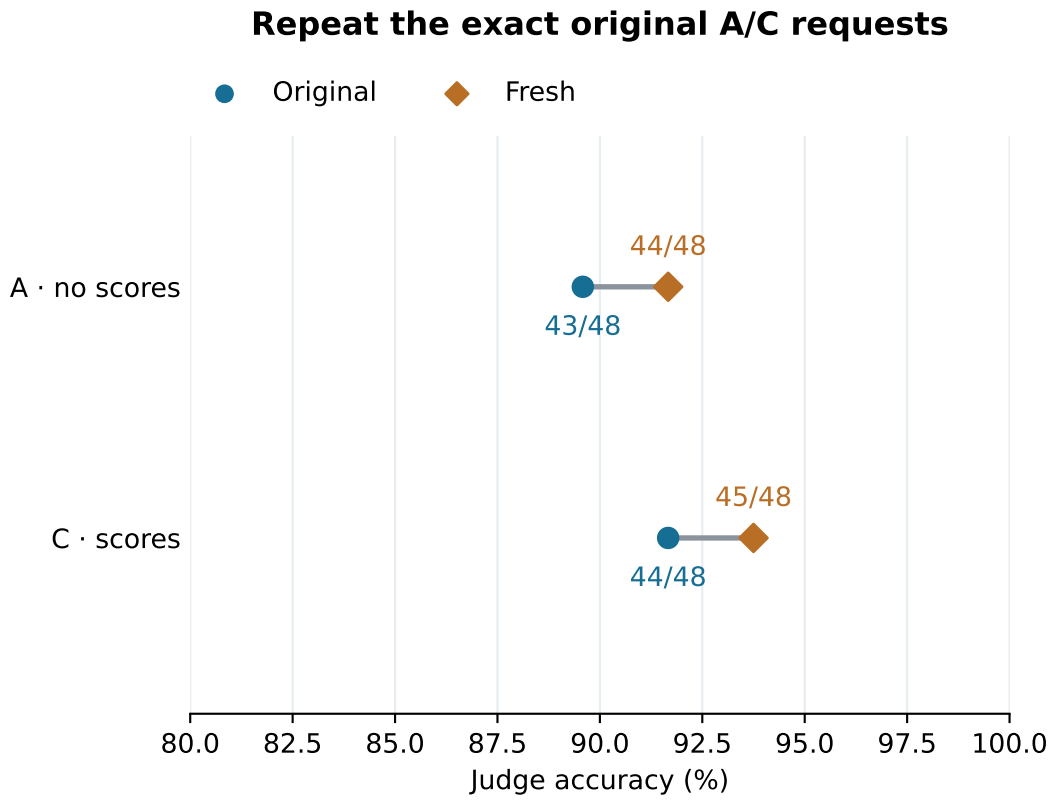
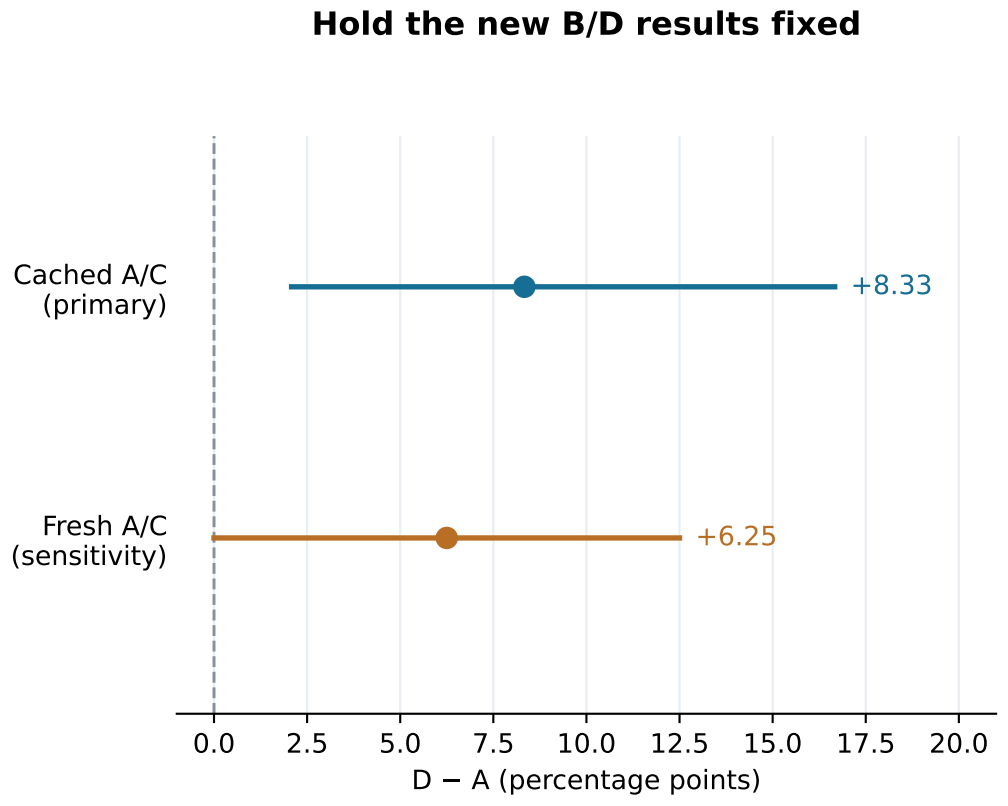
Haiku replay: how much does the reused baseline move?

Post-result diagnostic · all 96 original A/C requests · the same 24 story families





2/96 answers changed: 2 corrections, 0 new errors. All requests match; no receipt reuse. The primary grid is unchanged.
Original routing: Anthropic 56 / Azure 40; replay and B/D: Azure. No backend fingerprints were returned.
95% intervals resample the 24 families. Provider, time and sampling variation are not separately identified.
